

GEM CENTRAL

WHO WE ARE

Led by the Detroit Regional Partnership, the Global Epicenter of Mobility – or GEM – is designed to help build an inclusive and prosperous 21st century mobility sector.

With \$52.2-million in grant funds from the U.S. Economic Development Administration, GEM will help the Detroit region:

- Develop cutting-edge technology
- Create new quality jobs and careers
- Ready new sites for business

**ENGAGEMENT. INCLUSION. TRANSPARENCY.
COMMUNICATION. COLLABORATION. TRUST. INTELLIGENCE.**

These are the characteristics that drive a continuous cycle of innovation, entrepreneurship, and investment, and GEM Central is the unified body ensuring GEM's mobility projects are executed within these ideals.

GEM Central is responsible for helping the region's existing mobility ecosystem become better connected, smarter, more inclusive, and more adaptive to change.

It is the central convener between the GEM grant's project partners, offering research, communications, administrative support, and a DEI lens through which all programs are viewed. GEM Central also ensures alignment across project partners, GEM's advisory councils, mobility industry stakeholders, and GEM's expansive network of coalition partners.
